

LMS Implementation Reference Mapping & Traceability Specification

Project: Next.js 16.3.6 App Router Enterprise LMS Portal
Primary Reference: Open edX Architecture Specification (docs/OpenedX.md)
Secondary Reference: Moodle Technical Architecture Specification (docs/Moodle.md)
Specification Version: 2.2.0 | **Build Status:** Verified (tsc --noEmit , npm run build passing)
Deliverable Type: Complete Functional Click-Through Implementation & Research-to-Code Traceability
Portability Guarantee: All file linkages and screenshot citations in this document utilize strictly relative paths (../screenshots/...) to ensure complete cross-platform portability.

Implementation Scope & Architectural Fidelity Statement:

This specification documents the complete, functional click-through LMS portal implemented on top of Next.js 16.3.6 App Router, TypeScript, and Tailwind CSS v4. All learner-facing workflows, courseware hierarchy models, and assessment mechanics are directly derived from **Open edX** (docs/OpenedX.md), while all enterprise governance, capability-based RBAC, category taxonomy, and SpeedGrader evaluation tools are derived from **Moodle** (docs/Moodle.md). Every interaction across Student, Instructor, and Admin roles is fully functional with persistent reactive state in localStorage .

1. Project Overview

The **LMS Portal** is a production-grade, highly responsive, enterprise-tier Learning Management System built using Next.js 16.3.6 (App Router), TypeScript, Tailwind CSS v4, `@theme` design tokens, and the Base UI / Nova preset component system.

The primary objective of this project is to synthesize the learner-centric strengths of **Open edX** (modular 5-level courseware hierarchy, unit sequence bar, interactive cinema player, inline CAPA problem engines, and visual grade distribution charts) with the enterprise governance capabilities of **Moodle** (granular capability-based RBAC, multi-tenant organizational scoping, cohort and category governance, SpeedGrader assessment evaluation with interactive rubric scoring, and activity completion matrices) into a cohesive, modern portal that avoids the legacy UI clutter of traditional LMS software.

Every interaction within the portal is functional: authentication flows, role switching, catalog filtering, enrollment, course outline navigation, lesson progression, interactive quizzes with auto-scoring, file and text assignment submissions, instructor SpeedGrader evaluation, rubric scoring, grade updates, and administrative directory actions all operate seamlessly with reactive state persistence in `localStorage`.

2. Existing Project Structure

The codebase is organized under a modular Next.js App Router structure:

```

3. Research Documents Used

The portal's information architecture and behavioral logic are derived directly from the two comprehensive research documents in the `docs/` repository:

1. `OpenedX.md` (**Open edX Architecture Technical Specification**):

Covers the Open edX learner and instructor ecosystems, including the LMS student dashboard, Course About preview, 5-level curriculum hierarchy (Course → Section → Subsection → Unit → Component), Unit Sequencer with status icons, Cinema video player with synchronized transcripts, visual Progress and Grading distribution chart with cutoff thresholds, Course Dates milestones, CAPA problem components (single choice, multi-choice, numerical, dropdown), Studio course authoring, and faceted catalog search.

2. `Moodle.md` (**Moodle LMS Technical Architecture Specification**):

Covers Moodle's enterprise administrative governance, hierarchical capability-based access control (Context: System → Category → Course → Module), bulk user onboarding and action triggers, course and category taxonomy, activity completion tracking rules, SpeedGrader split-screen evaluation with interactive rubric criterion scoring, 2D Grader Report matrix, and custom reporting audit logs.

4. Reference Priority

To maintain clarity and prevent interface conflicts, the following functional hierarchy was enforced:

- **Primary Reference — Open edX (`OpenedX.md`):**

Prioritized for all learner-facing surfaces, including course discovery, course landing details, curriculum navigation, video playback with transcript anchoring, inline assessments (quizzes, coding challenges, assignment submission interfaces), learner progress visualization, and course authoring concepts.

- **Secondary Reference — Moodle (`Moodle.md`):**

Prioritized for governance, organizational administration, user and role management, departmental access guardrails, cohort grouping, grading management (SpeedGrader rubric grading and 2D grader matrices), category governance, and institutional reporting.

- **Harmonization Principle:**

Where Open edX lacked administrative granularity (such as manual rubric grading and multi-level category taxonomy), Moodle's patterns were incorporated. Where Moodle's legacy interface was overly dense or cumbersome, Open edX's clean, modern layout was applied.

5. Implemented Roles

The platform provides dedicated navigation, permissions, and views for 4 core institutional roles, switchable instantly via the top navigation bar:

1. **Student / Learner (`learner`):**

- Dedicated dashboard featuring "Resume Learning" deep links, active enrolled courses with progress bars, and upcoming assignment/quiz deadlines.
- Course catalog with faceted search, category pills, price filtering, and full syllabus preview modals.
- Distraction-free courseware player with cinema video mode, transcript seeking, inline CAPA quizzes, file/text assignment submission, Open edX stacked grade distribution chart, and milestone calendar sync (`.ics`).

- My Training overview, personal certifications repository, and discussion Q&A participation.

2. Instructor / Teacher (`instructor`):

- Instructor dashboard showing active authored courses, total student enrollments, completion metrics, and pending grading queues.
- Studio Course Builder with 3-tier curriculum management (sections, lessons, quizzes, assignments), 60-character title validation, cover image upload, and real-time readiness checklist sidebar.
- SpeedGrader Grading Hub featuring split-screen student submission inspection, interactive rubric criterion sliders, inline feedback input, and immediate grade publication.
- Live Grader Report 2D matrix displaying student rows versus graded items.

3. Organization Admin (`org-admin`):

- High-level executive dashboard showing enterprise KPIs, user role breakdown, and portal activity trends.
- Complete User Directory with instant search, role filtering, status toggling (Active/Suspended), and bulk CSV export.
- Course & Category Governance with color-swatch taxonomy management and course transfer guardrails.
- 12-section institutional reporting suite, compliance training matrices, and portal audit logs.

4. Super Admin / LMS Admin (`super-admin`):

- Multi-tenant organization tree management with sub-organization nesting and capability-level module gating.
- System-wide security and MFA policy enforcement, session revocation, white-label branding, and glossary terminology overrides.

6. Implemented Screens

Screen #	Screen Title	Role Access	Primary Reference	Corresponding Route
SCR-01	Split-Canvas Authentication & Demo Login	Public	Open edX SCR-01 / Moodle	<code>/auth/login</code>
SCR-02	Learner Dashboard & Quick Resume	Learner	Open edX SCR-02	<code>/learner/dashboard</code>
SCR-03	Course Catalog & Faceted Search	Learner / All	Open edX SCR-13	<code>/learner/catalog</code>
SCR-04	Course Overview & Syllabus Preview Modal	Learner / Public	Open edX SCR-03	<code>/learner/catalog</code>
SCR-05	Cinema Courseware Player & Unit Sequencer	Learner	Open edX SCR-04, 05, 06	<code>/learner/courses/[id]/player</code>
SCR-06	CAPA Quiz & Assessment Engine	Learner	Open edX SCR-09 / Moodle SCR-10	<code>/learner/courses/[id]/player</code>
SCR-07	Progress & Grade Distribution Visualizer	Learner	Open edX SCR-07	<code>/learner/courses/[id]/player</code>
SCR-08	Course Dates & Schedule Timeline	Learner	Open edX SCR-08	<code>/learner/courses/[id]/player</code>
SCR-09	Instructor Teaching Dashboard	Instructor	Open edX / Moodle	<code>/instructor/dashboard</code>

Screen #	Screen Title	Role Access	Primary Reference	Corresponding Route
SCR-10	Studio Course Builder & Curriculum Editor	Instructor / Admin	Open edX SCR-10, 11	<code>/instructor/courses/[id]</code>
SCR-11	SpeedGrader Review & Rubric Grading Hub	Instructor / Admin	Moodle SCR-11, 12, 13	<code>/instructor/grading</code>
SCR-12	Organization Admin Governance Dashboard	Org Admin	Moodle SCR-01	<code>/org-admin/dashboard</code>
SCR-13	User Directory & Bulk Actions Management	Org Admin / Super Admin	Moodle SCR-02, 03	<code>/org-admin/users</code>
SCR-14	Course Category Governance Hierarchy	Org Admin / Super Admin	Moodle SCR-05	<code>/org-admin/categories</code>
SCR-15	Comprehensive Institutional Reports & Analytics	Org Admin / Super Admin	Moodle SCR-15, 16	<code>/org-admin/reports</code>

7. Implemented Routes

Route	Role	Description
<code>/auth/login</code>	Public	Multi-role split-canvas login, OTP verification, 1-click role switcher
<code>/auth/signup</code>	Public	Onboarding registration flow with direct course enrollment linkage
<code>/learner/dashboard</code>	Learner	Learner cockpit with resume deep links, progress trackers, deadlines
<code>/learner/catalog</code>	Learner	Faceted course catalog with category filters and syllabus modal
<code>/learner/my-training</code>	Learner	Enrolled courses directory with completion statuses and launch buttons
<code>/learner/courses/[courseId]/player</code>	Learner	Full-screen course player, Video.js, transcript sync, quiz, progress
<code>/learner/calendar</code>	Learner	Interactive monthly, weekly, daily agenda of training milestones
<code>/learner/certificates</code>	Learner	Digital certificate wallet with verification codes and print dialogs
<code>/instructor/dashboard</code>	Instructor	Authoring hub, submission queues, active courses, enrollment stats
<code>/instructor/courses</code>	Instructor	Course directory with department-level ownership badges
<code>/instructor/courses/[courseId]</code>	Instructor	Studio-style 3-tier curriculum builder with live validation checklist
<code>/instructor/grading</code>	Instructor	Split-screen SpeedGrader and 2D Grader Report evaluation suite
<code>/org-admin/dashboard</code>	Org Admin	Executive analytics cockpit with KPI cards and portal activity line chart
<code>/org-admin/users</code>	Org Admin	User table with bulk status toggle, role assignment, CSV export
<code>/org-admin/categories</code>	Org Admin	Course taxonomy manager with swatch colors and course counts

Route	Role	Description
<code>/org-admin/reports</code>	Org Admin	12-section reporting suite (completion matrix, audit timeline, surveys)
<code>/org-admin/settings</code>	Org Admin	Platform settings: branding, glossary override, RBAC, session management

8. Student Journey

The Learner click-through workflow provides an uninterrupted, modern learning experience:

9. Instructor Journey

The Instructor click-through workflow provides authoring, monitoring, and evaluation capabilities:

10. Admin Journey

The Administrator click-through workflow provides organizational governance, RBAC, and reporting:

11. Component Architecture

The interface is constructed using modular, reusable components adhering to the design system:

```

src/components/
├─ layout/
│   ├─ AppShell.tsx           # Outer frame: dark nav rail, sticky topbar, RoleSwitcher
│   └─ RoleSwitcher.tsx      # Instant role-switching segmented control
├─ dashboard/
│   ├─ LearnerDashboard.tsx   # Learner widgets (Resume, Deadlines, Metrics)
│   ├─ InstructorDashboard.tsx # Instructor widgets (Authored courses, Pending reviews)
│   ├─ AdminDashboard.tsx     # Admin analytics cards, user donut chart, activity feed
│   └─ ManagerDashboard.tsx   # Team compliance matrix & approval inbox
├─ courses/
│   ├─ CourseCard.tsx        # 16:9 thumbnail, star rating, ribbon badges, syllabus CTA
│   ├─ CourseDetailsModal.tsx # Open edX Course About modal with full lesson outline
│   ├─ VideoPlayer.tsx       # HTML5 / Video.js player with hotkeys & transcript sync
│   ├─ QuizPlayer.tsx        # CAPA multiple-choice and single-choice problem engine
│   ├─ AssignmentPlayer.tsx   # File upload & text submission with rubric display
│   └─ CourseForm.tsx        # Single-page Studio course curriculum editor
└─ ui/                       # Atomic Base UI / Nova primitives (Button, Card, Badge, Dialog)

```

12. Open edX Reference Mapping (With Reference Images at the Point of Reference)

This section documents the research references from `docs/OpenedX.md`, placing the **authentic Open edX baseline screenshot directly at the point of each reference**:

Reference 1: Course Discovery & Catalog (`SCR-13` , `OpenedX.md` **Line 360**)

- **What the Research Specified:** Full-text keyword search against Meilisearch, subject/partner facets, and responsive course teaser cards with banner image and pacing pills.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built into `src/app/[role]/catalog/page.tsx` with category chips, price toggles, sort dropdowns, and Udemy-inspired 16:9 thumbnails.

Reference 2: Authentication Gateway (`SCR-01` , `OpenedX.md` Line 406)

- **What the Research Specified:** Centered branded auth card with floating inputs, password visibility toggle, forgot password workflow, and social SSO buttons.
- **Open edX Reference Screenshot:**

Forgot password

- **How It Was Adapted:** Implemented at `src/app/auth/login/page.tsx` with 2-step identifier/OTP verification, social SSO brand marks, and 1-click demo logins.

Reference 3: Course About & Syllabus Page (`SCR-03` , `OpenedX.md` Line 444)

- **What the Research Specified:** Course marketing landing page with effort estimates, learning objectives, weekly syllabus outline, and primary "Enroll now" CTA.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built as a responsive modal (`src/components/courses/CourseDetailsModal.tsx`) directly accessible from catalog cards with a single click.

Reference 4: Student Dashboard & Enrolled Courses (`SCR-02` , `OpenedX.md` Line 487)

- **What the Research Specified:** Learner homepage with "Continue Learning" banner, active enrolled course cards with progress meters, and "Begin/Resume Course" buttons.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built in `src/components/dashboard/LearnerDashboard.tsx` with Quick Resume hero card, weekly compliance goals, and enrolled course cards.

Reference 5: Course Home & Outline (`SCR-04` , `OpenedX.md` Line 529)

- **What the Research Specified:** Multi-tier collapsible accordion sections, lesson units with type badges (Video, Reading, Quiz), and progress rollup metrics.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Implemented in the course player's right drawer (`src/app/[role]/courses/[courseId]/player/page.tsx`) with searchable section accordions.

Reference 6: Cinema Learning Player & Unit Sequencer (`SCR-05` , `SCR-06` , `OpenedX.md` Line 570)

- **What the Research Specified:** Fixed-aspect video player stage, top sequence navigation bar with unit status icons, notes panel, and synchronized transcript seeking.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built in `src/app/[role]/courses/[courseId]/player/page.tsx` using Video.js with hotkey `B` note-taking, 5s rewind/forward, and transcript anchor seeking.

Reference 7: Progress & Grade Distribution Visualizer (`SCR-07` , `OpenedX.md` Line 617)

- **What the Research Specified:** Stacked bar visualizer illustrating cumulative learner score against a 50–70% passing threshold line, with category weighting tables.
- **Open edX Reference Screenshot:**

- How It Was Adapted:** Built at `src/app/[role]/users/page.tsx` with instant multi-criteria search, role pills, bulk status toggles, and client-side CSV downloads.

Reference 3: Course & Category Management Hierarchy (`SCR-05` , `Moodle.md` Line 473)

- What the Research Specified:** Multi-level course category tree with course counters, drag-and-drop ordering, and guarded deletion rules.
- Moodle Reference Screenshot:**

The screenshot displays a Moodle LMS interface. At the top, there's a navigation bar with links: Home, Dashboard, My courses, and Site administration. A search bar and user profile are on the right. Below the navigation bar, the breadcrumb trail reads: Courses / Faculty of Education / Manage courses and categories. The main heading is 'Faculty of Education'. Underneath, there are tabs: Category, Settings, Upload courses, and More. A dropdown menu shows 'Course categories and courses'. A search bar for courses is also present. The main content area is titled 'Manage course categories and courses'. It is divided into two panels. The left panel, 'Course categories', shows a list of categories: Faculty of Education (4 courses), LMS Resources (4 courses), Faculty of Arts and Humanities (0 courses), Faculty of Language and Literature (0 courses), Faculty of Health and Medicine (4 courses), and Our Community (3 courses). The right panel, 'Faculty of Education', shows a list of courses: Effective Memory Techniques, Critical Thinking: Develop your skills, Mindful Course Creation, and Digital Literacy. At the bottom right, a notification states: 'This site will be reset in 40 mins 30 secs'.

- **How It Was Adapted:** Built at `src/app/[role]/categories/page.tsx` with custom hex color swatches, course count chips, and interactive creation modals.

Reference 4: Quiz Activity Engine (`SCR-10` , `Moodle.md` Line 395)

- **What the Research Specified:** Time-restricted quiz activity with question pagination, multiple-choice selection, attempt tracking, and instant grade feedback.
- **Moodle Reference Screenshot:**

- How It Was Adapted:** Built in `src/app/[role]/reports/page.tsx` (Training Matrix tab) displaying user compliance pills across all required organizational tracks.

14. Combined / Adapted Functionality

Several features synthesize patterns from both reference LMS architectures:

1. Course Creation & Curriculum Builder:

- Combines Open edX's Studio outline structure (`SCR-10`) with Moodle's activity chooser and completion settings (`SCR-08`). The author creates sections and assigns unit types (Video, Quiz, Assignment, Reading) on a single screen without complex wizard page reloads.

2. Assignment Submissions & SpeedGrader:

- The learner submission interface adapts Open edX's Open Response Assessment (ORA) prompt layout, while the instructor evaluation view utilizes Moodle's SpeedGrader (`SCR-12`) and multi-criterion rubric engine (`SCR-11`).

3. Assessment Engine:

- Quizzes utilize Open edX's CAPA problem presentation with immediate explanation feedback, backed by Moodle-style automatic gradebook reporting.

15. Newly Designed Functionality

Functionality designed specifically for this portal to exceed traditional LMS limitations:

1. Top-Navigation 1-Click Role Switcher:

- A dedicated segmented switcher in `AppShe11` header allows immediate transitions between Learner, Instructor, Org Admin, and Super Admin states without requiring logout/login cycles during demonstrations.

2. Udemy-Style 16:9 Course Cards with Live Video Hover:

- Premium course card designs featuring star ratings, ribbon badges (`★ Bestseller`, `Highest Rated`, `Enrolled`), and direct "View Course Syllabus" modal triggers.

3. Dynamic Calendar Synchronization (`.ics` Export):

- Learners can export course deadlines and live webinar milestones directly into Outlook, Google Calendar, or Apple Calendar with one click.

4. Departmental Resource Guardrails:

- Visual `DepartmentLockBanner` alerts instructors when attempting to edit courses belonging to an adjacent department, with a functional "Request Co-Author Access" trigger.

16. Screenshot Evidence (Implemented Portal Workflows)

This section provides visual evidence of the **13 core implemented screens** within our modern Next.js LMS application, organized by institutional role:

16.1 Student / Learner Workflows

Screen 1: Student Dashboard & Quick Resume

Learner cockpit featuring Quick Resume hero card, enrolled courses with progress bars, and upcoming assignment deadlines.

The screenshot displays the ESSCI Learner Dashboard for a user named Rohan. The interface is clean and modern, with a light blue and white color scheme. On the left, there is a sidebar with navigation links: Dashboard, My Training, Catalog, Calendar, Certificates, and Discussions. The main content area is titled "Continue your learning journey, Rohan" and "Learner at ESSCI - Electronics". It features a large blue hero card for "Onboarding 2026: ESSCI Electronics & Culture" with a progress bar at 65% and a "Resume Learning" button. Below this, there is a section for "My Enrolled Courses" with three course cards: "Onboarding 2026: ESSCI Electronics & Culture" (65% complete), "Secure Coding Practices & Zero-Trust Defen..." (100% complete), and "Executive Leadership & Strategic Communic..." (0% complete). To the right, there are two sections: "Upcoming Deadlines" with two items: "Architecture Threat Modeling RFC" (Due in 3 days) and "Next.js 16 Edge Middleware Lab" (Due Oct 20, 2026); and "Verified Credentials" with two items: "Cloud Security Specialist" (Verified ID: ESSCI-SEC-2026) and "Top Quiz Performer" (100% on first attempt).

Screen 2: Course Catalog & Faceted Search

Course discovery catalog with category pills, price filter chips, keyword search, and Udemy-inspired 16:9 cards.

The screenshot shows the ESSCI Course Catalog interface. On the left is a sidebar with the ESSCI logo and navigation links: Dashboard, My Training, Catalog (highlighted), Calendar, Certificates, and Discussions. The main header includes a search bar, a breadcrumb 'Dashboard > Course Catalog', and user information 'Role: learner'. Below the header, the 'Catalog' section displays 'Discover and enroll in courses available at ESSCI · 7 courses found'. A faceted search bar allows filtering by 'All Categories', 'Any Price', and 'relevance'. The course cards are arranged in a grid. The first row shows four cards: 'Onboarding 2026: ESSCI Electronics & Culture' (Compliance, 4.6 stars, 65% progress, Free), 'Secure Coding Practices & Zero-Trust Defense' (Technical Skills, 4.8 stars, 100% progress, \$49), 'Executive Leadership & Strategic Communication' (Leadership, 4.9 stars, 0% progress, \$89), and 'Cloud Infrastructure & Kubernetes at Scale' (Technical Skills, 4.9 stars, \$129). The second row shows three cards: a laptop, a 'Highest Rated' card with a blue 'A' graphic, and a 'Bestseller' card featuring a man's portrait. Each card includes a progress bar, a 'Continue Learning' or 'Enroll Now' button, and a link to 'View Course Syllabus & Objectives'.

Screen 3: Course Overview & Syllabus Modal

Open edX Course About modal displaying learning objectives, prerequisites, instructor profile, and full lesson outline.

The screenshot shows a modal window for the course 'Onboarding 2026: ESSCI Electronics & Culture'. The modal has a close button in the top right. It features tabs for 'Compliance', 'Pacing: Self-Paced', 'Engineering', and a rating of '4.6 (214 ratings)'. The course title is prominently displayed, followed by a description: 'Comprehensive curriculum aligned with Open edX standards and Moodle academic rigor. Includes interactive video lectures, CAPA quizzes, and hands-on SpeedGrader evaluated assignments.' Below this, it lists '2 Sections', '6 Units ~4.5 Hours', and 'Verified Credential'. A green button labeled 'Start / Resume Learning' is present. The modal is divided into three sections: 'Overview & Objectives' (active), 'Course Syllabus (6 Units)', and 'Instructor Profile'. Under 'Overview & Objectives', there is a 'What You Will Master' section with four bullet points: 'Understand company policies and code of conduct', 'Set up development environment and tooling', 'Navigate internal systems and communication channels', and 'Complete required compliance training'. Below this, the 'PREREQUISITES & HARDWARE REQUIREMENTS' section lists: 'Basic knowledge of software systems and web architecture.', 'Modern web browser (Chrome, Firefox, Safari, Edge) with JavaScript enabled.', and 'No prior regulatory certification required — beginner to intermediate level.'

Screen 4: Cinema Courseware Player & Unit Sequencer

Distraction-free player featuring Video.js stage, hotkey timestamp notes, and expandable right curriculum drawer.

Question 1 of 3

Passing grade: 70% • 3 questions • Retakes allowed

QUESTION 1

What is the primary standard regarding data classification and handling under ESSCI's compliance policy?

A

Store all data in unencrypted public cloud storage for faster team accessibility

B

Classify and encrypt all Confidential and PII data both at rest and in transit

C

Commit API secrets directly to source control if the repository is private

D

Disable security auditing logs in pre-production staging environments

Screen 13: Comprehensive Institutional Reports & Analytics

12-section institutional reporting suite featuring compliance training matrix, administrative audit trail, and surveys.

17. Mock Data & Simulated State Architecture

To deliver an authentic click-through experience without external server dependencies, all state is managed using persistent, synchronized Zustand stores:

- auth-store.ts (lms-auth-store):**
 - Maintains active user identity, role, department, organization, MFA enrollment, and device trust expiry.
- courses-store.ts (lms-courses-store):**
 - Stores courseware entities with 3-tier curriculum structures, YouTube and direct MP4 video URLs, objectives, price, and category associations.
- enrollments-store.ts (lms-enrollments-storage):**
 - Tracks learner enrollment records, calculated percentage progress, completion timestamps, and due dates.
- submissions-store.ts (lms-submissions-store):**
 - Manages student assignment submissions, file metadata, interactive rubric criterion scores, qualitative instructor feedback, and grading status (pending vs graded).
- users-store.ts (lms-users-store):**
 - Holds the organization's user directory across Super Admin, Org Admin, Instructor, Learner, and Manager roles.
- categories-store.ts (lms-categories-store):**
 - Contains course categorization taxonomy with custom color swatches and active course counts.

18. Known Limitations

While fully functional as a frontend click-through prototype, the following architectural boundaries are in place:

1. Client-Side Persistence:

- All state modifications (course edits, user status changes, assignment submissions, rubric grades) persist in browser `localStorage`. Resetting browser data restores the default seeded state.

2. Simulated File Uploads:

- Assignment file submissions and course cover image uploads utilize HTML5 `FileReader` data URLs rather than S3/GCS multipart uploads.

3. Frontend Role Enforcement:

- Role boundaries are enforced via client-side routing and UI gating; true cryptographic authorization tokens (JWT/OAuth2) would be required in production.

4. Real-Time Video Analytics:

- Video progress is tracked via Video.js timeupdate events; backend xAPI/Caliper statement streaming is simulated.
-

19. Future Backend Requirements

For production deployment with a real server backend, the following APIs and services should be connected:

1. REST / GraphQL Courseware API:

- Endpoints for hierarchical course CRUD, versioned publishing, and draft moderation workflows.

2. Authentication & Identity Provider:

- OpenID Connect (OIDC) / SAML 2.0 integration for enterprise Single Sign-On and multi-factor authentication.

3. Assessment & Grading Dispatcher:

- Asynchronous grading workers for code sandbox execution and plagiarism analysis.

4. Cloud Storage & Transcoding Pipeline:

- AWS S3 or Google Cloud Storage bucket with AWS Elemental MediaConvert for adaptive HLS/DASH bitrate video streaming.

5. xAPI / LRS Learning Analytics:

- Learning Record Store (LRS) integration for fine-grained learner telemetry and SCORM package support.
-

20. Final Implementation Summary

The LMS Portal successfully realizes the complete set of requirements established by the **Open edX** and **Moodle** research specifications:

- **Open edX Priority:** The student experience incorporates the 5-level curriculum sequencer, cinema video player with transcript seeking, inline CAPA quizzes, Course About syllabus modals, and the stacked SVG grade distribution chart with passing cutoff markers.
- **Moodle Priority:** The administrative and teaching capabilities incorporate multi-tenant capability-based RBAC, searchable user directories with bulk actions, category governance, and the full SpeedGrader evaluation hub with interactive rubric criterion scoring.

- **Engineering Standard:** The entire solution runs cleanly on Next.js 16.3.6 App Router, TypeScript, and Tailwind CSS v4, achieving **100% build health** (`tsc --noEmit` and `npm run build` pass with exit code 0) and full visual verification across all roles.
