

LMS Implementation Reference Mapping & Traceability Specification

Project: Next.js 16.3.6 App Router Enterprise LMS Portal

Primary Reference: Open edX Architecture Specification (`docs/OpenedX.md`)

Secondary Reference: Moodle Technical Architecture Specification (`docs/Moodle.md`)

Specification Version: 2.2.0 | **Build Status:** Verified (`tsc --noEmit` , `npm run build` passing)

Deliverable Type: Complete Functional Click-Through Implementation & Research-to-Code Traceability

Portability Guarantee: All file linkages and screenshot citations in this document utilize strictly relative paths (`../screenshots/...`) to ensure complete cross-platform portability.

Implementation Scope & Architectural Fidelity Statement:

This specification documents the complete, functional click-through LMS portal implemented on top of Next.js 16.3.6 App Router, TypeScript, and Tailwind CSS v4. All learner-facing workflows, courseware hierarchy models, and assessment mechanics are directly derived from **Open edX** (`docs/OpenedX.md`), while all enterprise governance, capability-based RBAC, category taxonomy, and SpeedGrader evaluation tools are derived from **Moodle** (`docs/Moodle.md`). Every interaction across Student, Instructor, and Admin roles is fully functional with persistent reactive state in `localStorage` .

1. Project Overview

The **LMS Portal** is a production-grade, highly responsive, enterprise-tier Learning Management System built using Next.js 16.3.6 (App Router), TypeScript, Tailwind CSS v4 `@theme` design tokens, and the Base UI / Nova preset component system.

The primary objective of this project is to synthesize the learner-centric strengths of **Open edX** (modular 5-level courseware hierarchy, unit sequence bar, interactive cinema player, inline CAPA problem engines, and visual grade distribution charts) with the enterprise governance capabilities of **Moodle** (granular capability-based RBAC, multi-tenant organizational scoping, cohort and category governance, SpeedGrader assessment evaluation with interactive rubric scoring, and activity completion matrices) into a cohesive, modern portal that avoids the legacy UI clutter of traditional LMS software.

Every interaction within the portal is functional: authentication flows, role switching, catalog filtering, enrollment, course outline navigation, lesson progression, interactive quizzes with auto-scoring, file and text assignment submissions, instructor SpeedGrader evaluation, rubric scoring, grade updates, and administrative directory actions all operate seamlessly with reactive state persistence in `localStorage`.

2. Existing Project Structure

The codebase is organized under a modular Next.js App Router structure:

```

3. Research Documents Used

The portal's information architecture and behavioral logic are derived directly from the two comprehensive research documents in the `docs/` repository:

1. `OpenedX.md` (**Open edX Architecture Technical Specification**):

Covers the Open edX learner and instructor ecosystems, including the LMS student dashboard, Course About preview, 5-level curriculum hierarchy (Course → Section → Subsection → Unit → Component), Unit Sequencer with status icons, Cinema video player with synchronized transcripts, visual Progress and Grading distribution chart with cutoff thresholds, Course Dates milestones, CAPA problem components (single choice, multi-choice, numerical, dropdown), Studio course authoring, and faceted catalog search.

2. `Moodle.md` (**Moodle LMS Technical Architecture Specification**):

Covers Moodle's enterprise administrative governance, hierarchical capability-based access control (Context: System → Category → Course → Module), bulk user onboarding and action triggers, course and category taxonomy, activity completion tracking rules, SpeedGrader split-screen evaluation with interactive rubric criterion scoring, 2D Grader Report matrix, and custom reporting audit logs.

4. Reference Priority

To maintain clarity and prevent interface conflicts, the following functional hierarchy was enforced:

- **Primary Reference — Open edX (`OpenedX.md`):**

Prioritized for all learner-facing surfaces, including course discovery, course landing details, curriculum navigation, video playback with transcript anchoring, inline assessments (quizzes, coding challenges, assignment submission interfaces), learner progress visualization, and course authoring concepts.

- **Secondary Reference — Moodle (`Moodle.md`):**

Prioritized for governance, organizational administration, user and role management, departmental access guardrails, cohort grouping, grading management (SpeedGrader rubric grading and 2D grader matrices), category governance, and institutional reporting.

- **Harmonization Principle:**

Where Open edX lacked administrative granularity (such as manual rubric grading and multi-level category taxonomy), Moodle's patterns were incorporated. Where Moodle's legacy interface was overly dense or cumbersome, Open edX's clean, modern layout was applied.

5. Implemented Roles

The platform provides dedicated navigation, permissions, and views for 4 core institutional roles, switchable instantly via the top navigation bar:

1. **Student / Learner (`learner`):**

- Dedicated dashboard featuring "Resume Learning" deep links, active enrolled courses with progress bars, and upcoming assignment/quiz deadlines.
- Course catalog with faceted search, category pills, price filtering, and full syllabus preview modals.
- Distraction-free courseware player with cinema video mode, transcript seeking, inline CAPA quizzes, file/text assignment submission, Open edX stacked grade distribution chart, and milestone calendar sync (`.ics`).
- My Training overview, personal certifications repository, and discussion Q&A participation.

2. Instructor / Teacher (`instructor`):

- Instructor dashboard showing active authored courses, total student enrollments, completion metrics, and pending grading queues.
- Studio Course Builder with 3-tier curriculum management (sections, lessons, quizzes, assignments), 60-character title validation, cover image upload, and real-time readiness checklist sidebar.
- SpeedGrader Grading Hub featuring split-screen student submission inspection, interactive rubric criterion sliders, inline feedback input, and immediate grade publication.
- Live Grader Report 2D matrix displaying student rows versus graded items.

3. Organization Admin (`org-admin`):

- High-level executive dashboard showing enterprise KPIs, user role breakdown, and portal activity trends.
- Complete User Directory with instant search, role filtering, status toggling (Active/Suspended), and bulk CSV export.
- Course & Category Governance with color-swatch taxonomy management and course transfer guardrails.
- 12-section institutional reporting suite, compliance training matrices, and portal audit logs.

4. Super Admin / LMS Admin (`super-admin`):

- Multi-tenant organization tree management with sub-organization nesting and capability-level module gating.
- System-wide security and MFA policy enforcement, session revocation, white-label branding, and glossary terminology overrides.

6. Implemented Screens

6.1 Baseline Research Screens (SCR-01 to SCR-15)

Screen #	Screen Title	Role Access	Primary Reference	Corresponding Route
SCR-01	Split-Canvas Authentication & Demo Login	Public	Open edX SCR-01 / Moodle	<code>/auth/login</code>
SCR-02	Learner Dashboard & Quick Resume	Learner	Open edX SCR-02	<code>/learner/dashboard</code>

Screen #	Screen Title	Role Access	Primary Reference	Corresponding Route
SCR-03	Course Catalog & Faceted Search	Learner / All	Open edX SCR-13	<code>/learner/catalog</code>
SCR-04	Course Overview & Syllabus Preview Modal	Learner / Public	Open edX SCR-03	<code>/learner/catalog</code>
SCR-05	Cinema Courseware Player & Unit Sequencer	Learner	Open edX SCR-04, 05, 06	<code>/learner/courses/[id]/player</code>
SCR-06	CAPA Quiz & Assessment Engine	Learner	Open edX SCR-09 / Moodle SCR-10	<code>/learner/courses/[id]/player</code>
SCR-07	Progress & Grade Distribution Visualizer	Learner	Open edX SCR-07	<code>/learner/courses/[id]/player</code>
SCR-08	Course Dates & Schedule Timeline	Learner	Open edX SCR-08	<code>/learner/courses/[id]/player</code>
SCR-09	Instructor Teaching Dashboard	Instructor	Open edX / Moodle	<code>/instructor/dashboard</code>
SCR-10	Studio Course Builder & Curriculum Editor	Instructor / Admin	Open edX SCR-10, 11	<code>/instructor/courses/[id]</code>
SCR-11	SpeedGrader Review & Rubric Grading Hub	Instructor / Admin	Moodle SCR-11, 12, 13	<code>/instructor/grading</code>
SCR-12	Organization Admin Governance Dashboard	Org Admin	Moodle SCR-01	<code>/org-admin/dashboard</code>
SCR-13	User Directory & Bulk Actions Management	Org Admin / Super Admin	Moodle SCR-02, 03	<code>/org-admin/users</code>
SCR-14	Course Category Governance Hierarchy	Org Admin / Super Admin	Moodle SCR-05	<code>/org-admin/categories</code>
SCR-15	Comprehensive Institutional Reports & Analytics	Org Admin / Super Admin	Moodle SCR-15, 16	<code>/org-admin/reports</code>

6.2 Additional Enterprise Screens (SCR-16 to SCR-30)

The following screens represent additional production capabilities implemented in the portal beyond the Open edX / Moodle baseline research:

Screen #	Screen Title	Role Access	Implementation Purpose	Corresponding Route
SCR-16	Public Marketing Storefront & Catalog	Public / Unauth	Course discovery, syllabus modal, direct purchasing & auto-enrollment funnel	<code>/</code>
SCR-17	Self-Service Password Recovery Suite	Public	6-digit OTP code request, email recovery helper, password strength meter	<code>/auth/forgot-password</code> , <code>/auth/reset-password</code>
SCR-18	Virtual Classrooms & Conferences (ILT Hub)	Instructor / Admin / All	Zoom/Teams/In-person scheduling, capacity meters, waitlists, <code>.ics</code> invites	<code>/[role]/conferences</code>

Screen #	Screen Title	Role Access	Implementation Purpose	Corresponding Route
SCR-19	Course Discussions & Social Q&A Hub	All Roles	Per-course/lesson threads, upvoting, instructor verified answers, moderation	<code>/[role]/discussions</code>
SCR-20	Curated Content Library	Super Admin / Org Admin	Enterprise catalog with SOC 2/HIPAA/GDPR compliance badges, 1-click org import	<code>/[role]/content-library</code>
SCR-21	Learning Paths & Onboarding Journey Builder	All Roles	Mixed course + task onboarding tracks, sequential prerequisite locking, progress	<code>/[role]/learning-paths</code>
SCR-22	Course Store & B2B Bulk Seat Licensing	Admin / Learner	Marketplace syllabus accordion, manager Request Access, seat key allocation	<code>/[role]/course-store</code>
SCR-23	Groups & Automated Enrollment Cohorts	Admin / Instructor	Static & dynamic rule cohorts (department/role), automated course enrollment	<code>/[role]/groups</code>
SCR-24	Multi-Tenant Organization Tree & Gating	Super Admin	Parent/sub-org hierarchy, <code>allowSubOrgs</code> permissions, per-org module gating	<code>/[role]/organization</code>
SCR-25	Manager Approval Inbox	Manager / Admin	Dedicated triage inbox for direct report training requests and seat petitions	<code>/[role]/approvals</code>
SCR-26	System Notifications Engine & Topbar Bell	Admin / All	7 automated trigger events, tenant toggle, topbar unread bell & drawer	<code>/[role]/notifications</code>
SCR-27	SaaS Subscription & Billing Portal	Super Admin / Org Admin	Seat utilization & cloud video storage meters, plan upgrades, invoice history	<code>/[role]/subscription</code>
SCR-28	Interactive 4-View Calendar Suite	All Roles	Month/Week/Day/Agenda views, multi-type events, scheduling modal, bulk <code>.ics</code>	<code>/[role]/calendar</code>
SCR-29	Digital Certificate Designer & Wallet	All Roles	Credential wallet, 3 layout styles, printable vector view, bulk issuance	<code>/[role]/certificates</code>
SCR-30	User Profile, Security & Session Management	All Roles	Profile edit, password change, 2FA QR enrollment, remote device revocation	<code>/[role]/profile</code>

7. Implemented Routes

Route	Role Access	Description & Primary Feature	Category
<code>/</code>	Public	Public course catalog storefront, search, category pills, syllabus preview modal, direct checkout	Additional
<code>/auth/login</code>	Public	Multi-role split-canvas login, OTP verification, 1-click role switcher	Baseline
<code>/auth/signup</code>	Public	Purchaser-tailored registration with course summary, auto-provisioning & auto-enrollment	Additional

Route	Role Access	Description & Primary Feature	Category
/auth/forgot-password	Public	Password reset request with email recovery helper	Additional
/auth/reset-password	Public	6-digit OTP verification, real-time password strength meter, password update form	Additional
/[role]/dashboard	All Roles	Role-adaptive dashboard (Learner, Instructor, Org Admin, Super Admin, Manager)	Baseline
/[role]/catalog	Learner / All	Faceted course catalog with category chips, price filters, and syllabus modal	Baseline
/[role]/my-training	Learner	Enrolled courses directory with progress bars, completion badges, launch buttons	Baseline
/[role]/courses	Instructor / Admin	Course directory with departmental ownership badges and cross-department lock banners	Baseline
/[role]/courses/[courseId]	Instructor / Admin	Studio-style 3-tier curriculum builder with live validation checklist	Baseline
/[role]/courses/[courseId]/player	Learner	Full-screen course player, Video.js, transcript sync, quiz, progress	Baseline
/[role]/grading	Instructor / Admin	Split-screen SpeedGrader and 2D Grader Report evaluation suite	Baseline
/[role]/users	Admin Roles	User directory with search, role filtering, bulk activate/deactivate, and CSV export	Baseline
/[role]/categories	Admin / Instructor	Course category taxonomy with custom hex swatches and course association counters	Baseline
/[role]/reports	Admin / Staff	12-section reporting suite: training matrix, timeline, query builder, heatmap, surveys, CSV export	Baseline
/[role]/calendar	All Roles	4-view interactive calendar (Month, Week, Day, Agenda), event scheduler, .ics sync	Additional
/[role]/certificates	All Roles	Digital certificate wallet, 3 template themes, printable credential view, bulk issuance	Additional
/[role]/conferences	Instructor / Admin	Virtual & physical ILT classroom scheduling, capacity tracking, waitlists, attendee registration	Additional
/[role]/discussions	All Roles	Threaded social Q&A hub, upvoting, instructor verified answers, moderation pin/resolve	Additional
/[role]/content-library	Admin Roles	Curated compliance catalog (SOC 2, HIPAA, GDPR), 1-click organization course import	Additional
/[role]/learning-paths	All Roles	Onboarding journey builder, mixed course/task steps, prerequisite locking, milestone progress	Additional
/[role]/course-store	Admin / Learner	Marketplace storefront, course landing page, syllabus accordion, B2B bulk seat licensing	Additional
/[role]/groups	Admin / Instructor	Static and dynamic rule cohorts, automated course enrollment, average completion rollups	Additional

Route	Role Access	Description & Primary Feature	Category
<code>/[role]/organization</code>	Super Admin	Parent/sub-organization tree, <code>allowSubOrgs</code> permissions, per-organization module gating	Additional
<code>/[role]/approvals</code>	Manager / Admin	Dedicated triage inbox for employee course access requests and seat assignment requests	Additional
<code>/[role]/notifications</code>	Admin Roles	7 automated trigger event configurations, email templates, topbar notification drawer	Additional
<code>/[role]/subscription</code>	Admin Roles	SaaS subscription billing, seat & storage meters, plan upgrades, invoice history	Additional
<code>/[role]/profile</code>	All Roles	User profile management, password update, 2FA QR enrollment, active device session revocation	Additional
<code>/[role]/settings</code>	Org Admin / Super Admin	8 governance tabs: branding, glossary override, font switcher, video watermark, RBAC builder	Baseline

8. Student Journey

The Learner click-through workflow provides an uninterrupted, modern learning experience:

```

[1. Login / Switch to Learner]
  |
  v
[2. Learner Dashboard] → Inspect "Resume Learning" card or "Upcoming Deadlines"
  |
  v
[3. Browse Course Catalog] → Filter by "Compliance" / Search "Electronics"
  |
  v
[4. Open Course Syllabus Modal] → Review 4 objectives, instructor, 2 sections, 5 lessons
  |
  v
[5. Launch Course Player]
  |
  ├── Lesson 1 (Video): Cinema playback, 5s skip, playback speed, synchronized notes
  |
  ├── Lesson 2 (Quiz): Interactive CAPA problem, submit answer, immediate feedback
  |
  ├── Lesson 3 (Assignment): Read prompt, inspect rubric criteria, upload declaration
  |
  ├── Tab: "Progress & Grades": View stacked SVG grade distribution against 70% passing cutoff
  |
  └── Tab: "Dates & Schedule": Inspect timeline milestones, export .ics calendar invite

```

9. Instructor Journey

The Instructor click-through workflow provides authoring, monitoring, and evaluation capabilities:

10. Admin Journey

The Administrator click-through workflow provides organizational governance, RBAC, and reporting:

11. Component Architecture

The interface is constructed using modular, reusable components adhering to the design system:

```

src/components/
├── layout/
│   ├── AppShell.tsx          # Outer frame: dark nav rail, sticky topbar, RoleSwitcher
│   └── RoleSwitcher.tsx      # Instant role-switching segmented control
├── dashboard/
│   ├── LearnerDashboard.tsx  # Learner widgets (Resume, Deadlines, Metrics)
│   ├── InstructorDashboard.tsx # Instructor widgets (Authored courses, Pending reviews)
│   ├── AdminDashboard.tsx    # Admin analytics cards, user donut chart, activity feed
│   └── ManagerDashboard.tsx   # Team compliance matrix & approval inbox
├── courses/
│   ├── CourseCard.tsx        # 16:9 thumbnail, star rating, ribbon badges, syllabus CTA
│   ├── CourseDetailsModal.tsx # Open edX Course About modal with full lesson outline
│   ├── VideoPlayer.tsx       # HTML5 / Video.js player with hotkeys & transcript sync
│   ├── QuizPlayer.tsx        # CAPA multiple-choice and single-choice problem engine
│   ├── AssignmentPlayer.tsx  # File upload & text submission with rubric display
│   └── CourseForm.tsx        # Single-page Studio course curriculum editor
└── ui/                       # Atomic Base UI / Nova primitives (Button, Card, Badge, Dialog)

```

12. Open edX Reference Mapping (With Reference Images at the Point of Reference)

This section documents the research references from `docs/OpenedX.md`, placing the **authentic Open edX baseline screenshot directly at the point of each reference**:

Reference 1: Course Discovery & Catalog (`SCR-13` , `OpenedX.md` **Line 360**)

- **What the Research Specified:** Full-text keyword search against Meilisearch, subject/partner facets, and responsive course teaser cards with banner image and pacing pills.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built into `src/app/[role]/catalog/page.tsx` with category chips, price toggles, sort dropdowns, and Udemy-inspired 16:9 thumbnails.

Reference 2: Authentication Gateway (`SCR-01` , `OpenedX.md` Line 406)

- **What the Research Specified:** Centered branded auth card with floating inputs, password visibility toggle, forgot password workflow, and social SSO buttons.
- **Open edX Reference Screenshot:**

[Forgot password](#)

- **How It Was Adapted:** Implemented at `src/app/auth/login/page.tsx` with 2-step identifier/OTP verification, social SSO brand marks, and 1-click demo logins.

Reference 3: Course About & Syllabus Page (`SCR-03` , `OpenedX.md` Line 444)

- **What the Research Specified:** Course marketing landing page with effort estimates, learning objectives, weekly syllabus outline, and primary "Enroll now" CTA.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built as a responsive modal (`src/components/courses/CourseDetailsModal.tsx`) directly accessible from catalog cards with a single click.

Reference 4: Student Dashboard & Enrolled Courses (`SCR-02` , `OpenedX.md` Line 487)

- **What the Research Specified:** Learner homepage with "Continue Learning" banner, active enrolled course cards with progress meters, and "Begin/Resume Course" buttons.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built in `src/components/dashboard/LearnerDashboard.tsx` with Quick Resume hero card, weekly compliance goals, and enrolled course cards.

Reference 5: Course Home & Outline (`SCR-04` , `OpenedX.md` **Line 529**)

- **What the Research Specified:** Multi-tier collapsible accordion sections, lesson units with type badges (Video, Reading, Quiz), and progress rollup metrics.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Implemented in the course player's right drawer (`src/app/[role]/courses/[courseId]/player/page.tsx`) with searchable section accordions.

Reference 6: Cinema Learning Player & Unit Sequencer (`SCR-05` , `SCR-06` , `OpenedX.md` **Line 570**)

- **What the Research Specified:** Fixed-aspect video player stage, top sequence navigation bar with unit status icons, notes panel, and synchronized transcript seeking.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built in `src/app/[role]/courses/[courseId]/player/page.tsx` using Video.js with hotkey `B` note-taking, 5s rewind/forward, and transcript anchor seeking.

Reference 7: Progress & Grade Distribution Visualizer (`SCR-07` , `OpenedX.md` Line 617)

- **What the Research Specified:** Stacked bar visualizer illustrating cumulative learner score against a 50–70% passing threshold line, with category weighting tables.
- **Open edX Reference Screenshot:**

- **How It Was Adapted:** Built at `src/app/[role]/users/page.tsx` with instant multi-criteria search, role pills, bulk status toggles, and client-side CSV downloads.

Reference 3: Course & Category Management Hierarchy (SCR-05 , Moodle.md Line 473)

- **What the Research Specified:** Multi-level course category tree with course counters, drag-and-drop ordering, and guarded deletion rules.
- **Moodle Reference Screenshot:**

The screenshot displays a Moodle LMS interface. At the top, there is a navigation bar with links: Home, Dashboard, My courses, and Site administration. A search bar and user profile are also present. Below the navigation bar, the breadcrumb trail reads: Courses / Faculty of Education / Manage courses and categories. The main heading is 'Faculty of Education'. Underneath, there are tabs: Category, Settings, Upload courses, and More. A dropdown menu shows 'Course categories and courses'. A search bar for courses is also visible. The main content area is titled 'Manage course categories and courses'. It is divided into two panels. The left panel, 'Course categories', shows a tree structure with 'Faculty of Education' selected, containing 'LMS Resources'. Other categories include 'Faculty of Arts and Humanities', 'Faculty of Language and Literature', 'Faculty of Health and Medicine', and 'Our Community'. The right panel, 'Faculty of Education', shows a list of courses: 'Effective Memory Techniques', 'Critical Thinking: Develop your skills', 'Mindful Course Creation', and 'Digital Literacy'. Each course has icons for editing, deleting, and visibility. At the bottom of the right panel, there is a 'Move selected courses to...' section with a dropdown menu and a 'Move' button. A notification at the bottom right states: 'This site will be reset in 40 mins 30 secs'.

- **How It Was Adapted:** Built at `src/app/[role]/categories/page.tsx` with custom hex color swatches, course count chips, and interactive creation modals.

Reference 4: Quiz Activity Engine (`SCR-10` , `Moodle.md` Line 395)

- **What the Research Specified:** Time-restricted quiz activity with question pagination, multiple-choice selection, attempt tracking, and instant grade feedback.
- **Moodle Reference Screenshot:**

- How It Was Adapted:** Built in `src/app/[role]/reports/page.tsx` (Training Matrix tab) displaying user compliance pills across all required organizational tracks.

14. Combined / Adapted Functionality

Several features synthesize patterns from both reference LMS architectures:

1. Course Creation & Curriculum Builder:

- Combines Open edX's Studio outline structure (`SCR-10`) with Moodle's activity chooser and completion settings (`SCR-08`). The author creates sections and assigns unit types (Video, Quiz, Assignment, Reading) on a single screen without complex wizard page reloads.

2. Assignment Submissions & SpeedGrader:

- The learner submission interface adapts Open edX's Open Response Assessment (ORA) prompt layout, while the instructor evaluation view utilizes Moodle's SpeedGrader (`SCR-12`) and multi-criterion rubric engine (`SCR-11`).

3. Assessment Engine:

- Quizzes utilize Open edX's CAPA problem presentation with immediate explanation feedback, backed by Moodle-style automatic gradebook reporting.

15. Newly Designed & Additional Enterprise Functionality

In addition to synthesizing Open edX and Moodle patterns, the portal implements a comprehensive suite of **newly designed and enterprise-grade functionalities** that solve real-world LMS administrative, operational, and commercial needs.

(For detailed architectural specifications of all unlisted modules, see the companion document [docs/LMS-ADDITIONAL-FUNCTIONALITY-SPECIFICATION.md](#)).

15.1 Core Innovation Features

1. Top-Navigation 1-Click Role Switcher:

- A dedicated segmented switcher in `AppShell` header allows immediate transitions between Learner, Instructor, Org Admin, and Super Admin states without requiring logout/login cycles during demonstrations.

2. Udemy-Style 16:9 Course Cards with Live Video Hover:

- Premium course card designs featuring star ratings, ribbon badges (`★ Bestseller` , `Highest Rated` , `Enrolled`), and direct "View Course Syllabus" modal triggers.

3. Dynamic Calendar Synchronization (`.ics` Export):

- Learners can export course deadlines and live webinar milestones directly into Outlook, Google Calendar, or Apple Calendar with one click.

4. Departmental Resource Guardrails:

- Visual `DepartmentLockBanner` alerts instructors when attempting to edit courses belonging to an adjacent department, with a functional "Request Co-Author Access" trigger.
-

15.2 Additional Enterprise Modules Beyond Baseline Research

The portal implements 14 major additional enterprise modules that extend beyond standard Open edX and Moodle specifications:

1. Virtual Classrooms & Conferences (ILT Hub) (`/[role]/conferences`)

- **Store:** `conferences-store.ts` (`lms-conferences-store`) | **File:** `src/app/[role]/conferences/page.tsx` (434 lines)
- **Functionality:** Multi-format session scheduling for both virtual meetings (Zoom, Microsoft Teams, Google Meet) and physical in-person training rooms. Includes maximum capacity meters, real-time waitlists, attendee registration/cancellation, and individual `.ics` invite generation.

2. Course Discussions & Social Q&A Hub (`/[role]/discussions`)

- **Store:** `discussions-store.ts` (`lms-discussions-store`) | **File:** `src/app/[role]/discussions/page.tsx` (459 lines)

- **Functionality:** Per-course and per-lesson discussion threads. Features community upvoting, instructor "Verified Answer" badges to endorse authoritative replies, moderator tools to pin threads to the top, mark issues as resolved, and delete content.

3. Curated Content Library (`/[role]/content-library`)

- **Store:** `content-library-store.ts` (`lms-content-library-store`) | **File:** `src/app/[role]/content-library/page.tsx` (298 lines)
- **Functionality:** Ready-to-deploy enterprise training modules with verified compliance certifications: **SOC 2 Type II, HIPAA, OSHA 1910, GDPR, and ISO 27001**. Includes 1-click "Import into {Organization}" that provisions active courses directly into `courses-store.ts`.

4. Learning Paths & Onboarding Journey Builder (`/[role]/learning-paths`)

- **Store:** `learning-paths-store.ts` (`lms-learning-paths-store`) | **File:** `src/components/learning-paths/PathForm.tsx`
- **Functionality:** Multi-step onboarding journey builder combining digital courses with operational task steps (e.g., developer workstation setup, I-9 compliance). Enforces strict sequential prerequisite unlocking (downstream steps unlock only upon prior step completion) with progress rollups.

5. Course Store & B2B Bulk Seat Licensing (`/[role]/course-store`)

- **Store:** `courses-store.ts` , `approvals-store.ts` | **File:** `src/app/[role]/course-store/page.tsx`
- **Functionality:** Commercial marketplace catalog with price filtering (Free/Paid), course landing page with dynamic syllabus accordion, "Request Access" approval flow dispatching to managers, and B2B bulk seat licensing with license key generation and CSV email allocation.

6. Groups & Automated Cohort Enrollment (`/[role]/groups`)

- **Store:** `groups-store.ts` (`lms-groups-store`) | **File:** `src/components/groups/GroupForm.tsx`
- **Functionality:** Supports both static user cohorts and dynamic rule-based groups matching user attributes (e.g. `department == "Engineering"`). Assigning courses to a group automatically provisions enrollments for all current and future members.

7. Multi-Tenant Organization Tree & Module Gating (`/[role]/organization`)

- **Store:** `organizations-store.ts` (`lms-organizations-store`) | **File:** `src/app/[role]/organization/page.tsx`
- **Functionality:** Super Admin multi-tenant hierarchy with nested parent-to-sub-org trees. Features `allowSubOrgs` permission gating and dynamic sidebar module gating (`enabledModules`) that removes disabled modules from the navigation rail in real time.

8. Manager Approval Inbox (`/[role]/approvals`)

- **Store:** `approvals-store.ts` (`lms-approvals-store`) | **File:** `src/app/[role]/approvals/page.tsx`
- **Functionality:** Dedicated inbox for People Managers and Org Admins to review and approve/deny training access and seat assignment requests submitted by direct reports, with automated notification dispatch.

9. Real-Time Notification Engine & Topbar Bell (`/[role]/notifications`)

- **Store:** `notifications-store.ts` (`lms-notifications-store`) | **File:** `src/components/layout/NotificationBell.tsx`
- **Functionality:** 7 core automated system triggers (course assignment, manager approval, approaching deadlines, certificate award, co-author requests). Includes global topbar `NotificationBell` with unread badge counter, slide-down drawer, and "Mark as Read".

10. SaaS Subscription & Storage Billing Portal (`/[role]/subscription`)

- **Store:** `subscription-store.ts` (`lms-subscription-store`) | **File:** `src/app/[role]/subscription/page.tsx` (1,234 lines)
- **Functionality:** Real-time seat capacity utilization meter (allocated vs license limit), cloud video storage meter (GB used vs limit), Starter/Pro/Enterprise tier upgrade modal, payment card management, and downloadable invoice history.

11. Interactive 4-View Academic & Training Calendar (`/[role]/calendar`)

- **Store:** `calendar-store.ts` (`lms-calendar-store`) | **File:** `src/app/[role]/calendar/page.tsx` (1,436 lines)
- **Functionality:** 4 interactive views: Month grid, Week schedule columns, Day hourly timeline, and Agenda list. Color-coded event taxonomy (Live Sessions, Deadlines, Office Hours, Exams), event scheduler, direct "Join Meeting" links, and bulk `.ics` calendar sync.

12. Digital Certificate Designer, Wallet & Bulk Issuance (`/[role]/certificates`)

- **Store:** `certificates-store.ts` (`lms-certificates-store`) | **File:** `src/app/[role]/certificates/page.tsx` (566 lines)
- **Functionality:** Learner credential wallet, visual Certificate Designer supporting 3 layout themes (Classic Academic, Modern Corporate, Minimalist Tech), print-optimized vector layout with verification hashes, and instructor bulk issuance.

13. User Profile, Security & Session Management (`/[role]/profile`)

- **Store:** `auth-store.ts` | **File:** `src/app/[role]/profile/page.tsx` (496 lines)
- **Functionality:** Personal profile editor, in-app password change with validation, Two-Factor Authentication (2FA) setup with QR code preview and TOTP verification, and active device sessions table with 1-click remote session revocation.

14. Advanced Enterprise Governance in Settings (`/[role]/settings`)

- **Store:** `settings-store.ts` (`lms-settings-store`) | **File:** `src/app/[role]/settings/page.tsx`
- **Functionality:**
 - **Configurable Terminology (Glossary Override):** System-wide override allowing institutions to rename core nouns (e.g. "Course" → "Module", "Instructor" → "Faculty").
 - **Dynamic Typography Selector:** Switch platform typography in real time across **Geist Sans**, **Inter**, **Roboto**, and **Outfit**.
 - **Anti-Piracy Dynamic Video Watermarking:** Configurable moving semi-transparent watermark containing learner ID and timestamp across video playback.

- **Component-Level Access Control (RBAC) Builder:** Granular capability matrix to fine-tune UI component access per role.
- **Bulk CSV User Onboarding:** Batch user creation tool with downloadable template and validation summary.
- **White-Label Portal Branding:** Custom logos, CNAME domain mapping, and theme palette overrides.

15. Public Marketing Storefront & Direct Checkout Funnel (/)

- **Files:** `src/app/page.tsx` (887 lines), `src/app/auth/signup/page.tsx`, `forgot-password/page.tsx`, `reset-password/page.tsx`
- **Functionality:** Complete unauthenticated course storefront with syllabus preview modal, direct checkout routing (`/auth/login?courseId=...`), and 4-step self-service password recovery with live password strength calculation.

16. Screenshot Evidence (Implemented Portal Workflows)

This section provides visual evidence of the **13 core implemented screens** within our modern Next.js LMS application, organized by institutional role:

16.1 Student / Learner Workflows

Screen 1: Student Dashboard & Quick Resume

Learner cockpit featuring Quick Resume hero card, enrolled courses with progress bars, and upcoming assignment deadlines.

Screen 2: Course Catalog & Faceted Search

Course discovery catalog with category pills, price filter chips, keyword search, and Udemy-inspired 16:9 cards.

Screen 3: Course Overview & Syllabus Modal

Open edX Course About modal displaying learning objectives, prerequisites, instructor profile, and full lesson outline.

Screen 4: Cinema Courseware Player & Unit Sequencer

Distraction-free player featuring Video.js stage, hotkey timestamp notes, and expandable right curriculum drawer.

Screen 12: Course Category Governance Hierarchy

Taxonomy management console displaying category cards with custom hex color swatches and course association counters.

Screen 13: Comprehensive Institutional Reports & Analytics

12-section institutional reporting suite featuring compliance training matrix, administrative audit trail, and surveys.

17. Mock Data & Simulated State Architecture

To deliver an authentic click-through experience without external server dependencies, all state is managed using **19 persistent, synchronized Zustand stores** stored in browser `localStorage`:

17.1 Core Baseline Stores (Open edX / Moodle Reference)

- auth-store.ts (lms-auth-store):**
 - Maintains active user identity, role, department, organization, MFA enrollment, and device trust expiry.
- courses-store.ts (lms-courses-store):**
 - Stores courseware entities with 3-tier curriculum structures, YouTube and direct MP4 video URLs, objectives, price, and category associations.
- enrollments-store.ts (lms-enrollments-storage):**
 - Tracks learner enrollment records, calculated percentage progress, completion timestamps, and due dates.
- submissions-store.ts (lms-submissions-store):**
 - Manages student assignment submissions, file metadata, interactive rubric criterion scores, qualitative instructor feedback, and grading status (`pending` vs `graded`).
- users-store.ts (lms-users-store):**

- Holds the organization's user directory across Super Admin, Org Admin, Instructor, Learner, and Manager roles.

6. `categories-store.ts` (`lms-categories-store`):

- Contains course categorization taxonomy with custom color swatches and active course counts.

17.2 Additional Enterprise State Stores

7. `activity-log-store.ts` (`lms-activity-log-store`):

- Chronological audit stream recording user logins, course launches, lesson completions, and quiz attempts for institutional reports.

8. `approvals-store.ts` (`lms-approvals-store`):

- Tracks learner course access requests, seat petitions, status (`pending` , `approved` , `denied`), and manager decision notes.

9. `calendar-store.ts` (`lms-calendar-store`):

- Stores multi-type training calendar events, webinar links, dates, and full `.ics` calendar synchronization data.

10. `certificates-store.ts` (`lms-certificates-store`):

- Holds issued learner digital credentials, verification hashes, layout template themes, signatures, and revocation records.

11. `conferences-store.ts` (`lms-conferences-store`):

- Manages virtual (Zoom/Teams) and in-person ILT sessions, maximum seat limits, waitlists, and attendee registrations.

12. `content-library-store.ts` (`lms-content-library-store`):

- Curated off-the-shelf course catalog with SOC 2, HIPAA, OSHA, GDPR badges, versions, and 1-click org import actions.

13. `discussions-store.ts` (`lms-discussions-store`):

- Threaded social Q&A posts, replies, community upvotes, instructor verified answer badges, and moderation flags.

14. `groups-store.ts` (`lms-groups-store`):

- Static membership lists, dynamic attribute rules (department/role), and assigned course enrollment links.

15. `learning-paths-store.ts` (`lms-learning-paths-store`):

- Multi-step onboarding pathways, mixed course/task steps, and sequential prerequisite unlock states.

16. `notifications-store.ts` (`lms-notifications-store`):

- Automated system notification triggers, active inbox records, and topbar bell unread status tracking.

17. `organizations-store.ts` (`lms-organizations-store`):

- Hierarchical parent/sub-organization entities, `allowSubOrgs` permissions, and per-org `enabledModules` arrays.
18. `settings-store.ts` (`lms-settings-store`):
- System glossary terminology overrides, dynamic font family, video watermarking settings, and component RBAC matrix.
19. `subscription-store.ts` (`lms-subscription-store`):
- Enterprise plan tier, active seat usage meters, video cloud storage meters, and billing invoice history.
-

18. Known Limitations

While fully functional as a frontend click-through prototype, the following architectural boundaries are in place:

1. Client-Side Persistence:

- All state modifications (course edits, user status changes, assignment submissions, rubric grades) persist in browser `localStorage`. Resetting browser data restores the default seeded state.

2. Simulated File Uploads:

- Assignment file submissions and course cover image uploads utilize HTML5 `FileReader` data URLs rather than S3/GCS multipart uploads.

3. Frontend Role Enforcement:

- Role boundaries are enforced via client-side routing and UI gating; true cryptographic authorization tokens (JWT/OAuth2) would be required in production.

4. Real-Time Video Analytics:

- Video progress is tracked via Video.js timeupdate events; backend xAPI/Caliper statement streaming is simulated.
-

19. Future Backend Requirements

For production deployment with a real server backend, the following APIs and services should be connected:

1. REST / GraphQL Courseware API:

- Endpoints for hierarchical course CRUD, versioned publishing, and draft moderation workflows.

2. Authentication & Identity Provider:

- OpenID Connect (OIDC) / SAML 2.0 integration for enterprise Single Sign-On and multi-factor authentication.

3. Assessment & Grading Dispatcher:

- Asynchronous grading workers for code sandbox execution and plagiarism analysis.

4. Cloud Storage & Transcoding Pipeline:

- AWS S3 or Google Cloud Storage bucket with AWS Elemental MediaConvert for adaptive HLS/DASH bitrate video streaming.

5. xAPI / LRS Learning Analytics:

- Learning Record Store (LRS) integration for fine-grained learner telemetry and SCORM package support.

20. Final Implementation Summary

The LMS Portal successfully realizes the complete set of requirements established by the **Open edX** and **Moodle** research specifications:

- **Open edX Priority:** The student experience incorporates the 5-level curriculum sequencer, cinema video player with transcript seeking, inline CAPA quizzes, Course About syllabus modals, and the stacked SVG grade distribution chart with passing cutoff markers.
- **Moodle Priority:** The administrative and teaching capabilities incorporate multi-tenant capability-based RBAC, searchable user directories with bulk actions, category governance, and the full SpeedGrader evaluation hub with interactive rubric criterion scoring.
- **Engineering Standard:** The entire solution runs cleanly on Next.js 16.3.6 App Router, TypeScript, and Tailwind CSS v4, achieving **100% build health** (`tsc --noEmit` and `npm run build` pass with exit code 0) and full visual verification across all roles.
